[1] The figures of Revenue and Expenditure are for the year ended 31st December of each year until 1871, when the financial year was changed so as to terminate on the 30th June. The figures for 1871 are therefore for the six months ended 30th June, and the figures for subsequent years are for the twelve months ended 30th June.

[2] In addition to the quantity of land sold and amount realized within the year, the figures under the head "Land Sales" represent, during each of the years after 1868, the total extent of, and amount paid on, lands purchased under deferred payments of which the payments were completed within the year, although such payments had extended over a series of years. The extent selected, of which the purchase had not been completed, is not included in the area sold.

[3] Since the year 1864, a considerable quantity of wool has each year been imported into Victoria across the Murray, from the Riverina district of New South Wales, for transport by railway to Melbourne and shipment thence. Prior to 1872 no precise record of the quantity so introduced was kept at the Customs. It has, however, been ascertained that at least 13,000,000 lbs. of wool, valued at £972,000, crossed the Murray into Victoria in the year 1870, and the following amounts in the years named:—19,552,598 lbs., valued at £1,096,772, in 1872; 31,542,913 lbs., valued at £1,745,550, in 1873; 35,332,089 lbs., valued at £1,975,879, in 1874; 40,535,081 lbs., valued at £2,260,799, in 1875; and 44,430,185 lbs., valued at £2,039,009, in 1876.

[4] The quantities of flour, bread, and biscuit imported and exported are reduced to their equivalent in bushels, on the assumption that one bushel of wheat produces 45 lbs. of either of those articles.

[5] The births and deaths given for 1853 are all of which there is any record: but it is known that the figures considerably under-state the truth. It is supposed that each in reality amounted to not less than 5,000. The deficiency has chiefly arisen from the fact that the system of registering births and deaths was entirely changed during the year 1853, and the new system was not at first properly understood. In consequence of this, and also owing to the unsettled state of the goldfield population, it is known that many children born were neither baptized nor registered, and many persons who died were buried without registration or funeral service.

[6] The returns of gold exports for the four years, 1852–1855, contain, in addition to the amounts which passed through the Customs of this colony, the following quantities of Victorian gold which passed through the Customs of the adjacent colonies without being recorded in Victoria:—1852, 749,957 oz., value £2,624,851; 1853, 652,297 oz., value £2,446,114; 1854, 247,366 oz., value £958,543; 1855, 41,530 oz., value £166,120. Total, 1,691,150 oz., value £6,195,628. No estimate has been given of the further quantity of gold taken out of the colony by private hand and not recorded in any Custom House. The returns show the gross exports. Scarcely any gold appears in the import returns until after the gold export duty was abolished at the end of 1867. Since then, the following are the imports of gold, chiefly from New Zealand:—1868, 326,550 oz., value £1,305,825; 1869, 363,716 oz., value £1,415,473; 1870, 376,926 oz., value £1,507,068; 1871, 329,181 oz., value £1,317,018; 1872, 246,641 oz., value £986,494; 1873, 252,576 oz., value £991,410; 1874, 220,541 oz., value £881,717; 1875, 216,666 oz., value £869,419; 1876, 138,555 oz., value £553,821.

[7] The expenditure for 1871 is for the first six months only. Prior to that date the expenditure was for the year ended 31st December. Since that date it has been for the year ended 30th June. The figures do not include amounts expended by municipal governments.

[8] These returns are those of the Government and private railways combined. The former are for the year ended 31st December until 1870; those for 1871 are for the six months ended 30th June, those for 1872 and three following years are for the twelve months ended 30th June, and those for 1876 are for the year ended 31st December. The returns of private railways are for the year ended 31st December throughout.

[9] Post Office Savings Banks were first opened in 1865. Hence the increase in the amounts in these columns from that year. The returns for the Post Office Savings Banks are for the years ended 31st December, those for the ordinary Savings Banks are for the years ended 30th June.

[10] These figures do not give particulars of all the Friendly Societies in the colony, but only of such as furnished returns in each year.

[11] The increase in the number of telegrams commencing in 1870 was consequent on a reduction in the rates.

* The Migratory Population has been computed chiefly from the number of householders known to have escaped enumeration owing to their having changed their residences between the time of the schedules being deposited and the time they should have been collected, with a few additions of persons reported by the enumerators to have been encamped in their districts on the Census night, but whom the sub-enumerators did not succeed in meeting with. No attempt has been made to form an estimate of unenumerated persons of whose existence no definite information was obtained.

[1] The financial year of Melbourne and Geelong ends on the 31st August, that of all other Municipalities on the 30th September.

[2] In the Borough of St. Kilda no estimate of the total value of rateable property has been returned; it has, therefore, been calculated at the rate of ten times the annual value.

[1] The financial year of Melbourne and Geelong ends on the 31st August, that of all other Municipalities on the 30th September.

[2] In many instances the value of town halls, furniture, waterworks, &c., has been reckoned by the municipal authorities as part of the assets.

[3] In this column the amounts of outstanding loaus have been included with the liabilities.

[4] The revenue of and expenditure on the local waterworks are not included.

NOTE.—The returns of Revenue and Expenditure in this Table represent the *net* receipts and expenditure of the year under review, exclusive of credit and debit balances, bank overdrafts, loans, &c.; to insure uniformity and accuracy, therefore, the returns in which these items were included have been corrected from the printed balance-sheets.

HENRY HEYLYN HAYTER, Government Statist.

[1] In many instances the value of shire halls, furniture, &c., has been reckoned by the authorities as part of the assets.

[2] In this column the amounts of outstanding loans have been included with the liabilities.

[3] In consequence of some of the books of the Shire of Dundas having been burnt it was found impossible to give accurately more than the gross totals of revenue and expenditure. The details therefore have been estimated.

NOTE.—The returns of Revenue and Expenditure in this table represent the *net* receipts and expenditure of the year under review, exclusive of credit and debit balances, bank overdrafts, loans, &c.; to insure uniformity and accuracy, therefore, the returns, in which these items were included, have been corrected from the printed balance-sheets.

HENRY HEYLYN HAYTER, Government Statist.

* The items in this Table are summarised according to the principle agreed to at a conference of Government Statists of several of the Australian Colonies, held in Tasmania in the month of February 1875.

† This account was created under the *Land Act* 1869 (33 Vict. No. 360, secs. 42 and 43), whereby it was provided that an amount of £200,000, proceeding from the alienation of land, should be placed annually to a trust account, the moneys standing to the credit of which should be available for the re-purchase of debentures, or the further construction of railways. The total amount which had been paid to this fund, up to the 30th June 1876, was £1,300,000, of which had been expended, all on the survey or construction of lines of railway, £1,040,644 10*s.* 11*d.*

‡ For the details of this item see Supplementary Table *post.*

[1] Of this amount only £323,100 11s. 2d. was paid during the year 1869. The remainder (£471,442) was distributed over the previous seven years, being the sum of the yearly payments of 2s. 6d. per acre on 537,293 acres.——[2] Of this amount the sum of £331,005 11s. 4d. was received during the year 1870. The remainder (£132,814 19s.) was brought to account in former years as rents, license fees, &c., under sections 22, 33, and 34, Land Act 1862, and under sections 12 and 42 Amending Land Act 1865.——[3] Of this amount the sum of £257,541 15s. 4d. was received during the year 1871. Of the remainder (£270,577 10s. 7d.) the greater part was paid as rents and license fees during former years.——[4] Of this amount the sum of £249,300 8s. 10d. was received during the year 1872. Of the remainder (£609,841 2s.) the greater part was paid as rents and license fees during former years.——[5] Of this amount the sum of £112,936 10s. 2d. was received during the year 1873. Of the remainder (£508,535 2s. 8d.) the greater part was paid as rents and license fees during former years.——[6] Of this amount the sum of £206,897 7s. 9d. was received during the year 1874. Of the remainder (£372,153 9s. 6d.) the greater part was paid as rents and license fees during former years.——[7] Of this amount the sum of £383,672 17s. 7d. was received during the year 1875. Of the remainder (£246,381 1s. 9d.) the greater part was paid as rents and license fees during former years.——[8] Of this amount the sum of £376,863 18s. 11d. was received during the year 1876. Of the remainder (£208,075 5s. 6d.) the greater part was paid as rents and license fees during former years.

NOTE.—The number and extent of runs in each district are taken from a Return furnished by the Department of Lands and Survey. The remainder of the Table has been compiled chiefly from statements voluntarily furnished by the squatters, during the first quarter of 1877, in reply to enquiries from the Department of the Government Statist. In cases where the enquiries were not responded to, the figures have been supplied, as far as possible, from other sources.

* Tobacco crop 1875-6 is reported to have failed in most of the districts.

NOTE.—It is to be borne in mind, with reference to the returns of vines, that, whilst the acreage and number of vines, in common with the remainder of the Statistics, are for the year ended 31st March 1877, the quantity of grapes gathered and of wine and brandy made are for the previous season. The grape crop comes in too late to admit of its being returned when the Agricultural Statistics are collected.

* Consisting of carrot, parsnip, onion, lettuce, &c., seeds. The produce was not returned.

NOTE.—The items in this Table do not represent the whole quantity of the respective crops grown, but only such as were taken cognizance of by the collectors. The minor crops are often raised in gardens, in which case the various descriptions would not be distinguished. They may be also grown upon allotments of a smaller extent than one acre, and these the collectors are not called upon to visit. The Table must therefore be looked upon as indicating the nature of certain crops grown in Victoria rather than the full extent to which those crops are cultivated.

NOTE.—The live stock on farms and land unconnected with stations is returned by the Collectors of Agricultural Statistics, who are instructed to supplement the information they obtain at the holdings they visit with estimates of the stock running on commons, of that kept by persons having allotments of less than an acre in extent, of that stalled and stabled in towns and villages, and of that belonging to the road carters traversing their districts. For some of the larger towns the collectors have been unable to furnish estimates, and for these the census figures have been taken. The return of stock on stations has been compiled, as far as possible, from estimates furnished by the squatters in reply to enquiries made by this department. In a considerable number of instances, however, these enquiries have not been responded to, and in such cases it has been necessary to supply the particulars from the returns of former years. Every effort is made to give as true a statement as possible of the numbers of all the stock in the colony; but it is necessary to point out that portion of the information is derived from estimates which can only be rectified at a general census.

* The figures in this column apply to purchased lands only. Fifty-one of the stone quarries were on Crown lands, and in these cases no valuation of the land has been given.

† These particulars have been combined, in accordance with a promise made to the persons supplying the information that the contents of individual schedules would not be published.

* Some of the stone quarries returned each year have been upon Crown lands. In these cases no valuation of the land has been given.

† There is reason to believe that these amounts include the value of stone-breaking machines used in connection with one of the larger quarries as well as of machinery used in the actual working of the quarry.

* The figures in this column apply to purchased lands only. Two hundred and three of the manufactories were carried on upon Crown lands, and in these cases no valuation of the land has been given.

† This number is less than that of the corresponding column of last year's manufactories Table in consequence of the exclusion of the water works upon this occasion. *See* second footnote to Table at page 59, *post.*

* The figures in this column apply to purchased lands only. Two hundred and three of the manufactories were carried on upon Crown lands, and in these cases no valuation of the land has been given.

† Water works have not been included, as they are not, properly speaking, manufactories. Last year the returns of five water works appeared in the Table, employing 71 hands, with machinery and plant valued at £1,758,620, lands valued at £8,000, and buildings valued at £5,350. A Table of all the water works in the colony is published at page 70, *post*.

MANUFACTORIES, WORKS, ETC.—RETURN FOR ELEVEN YEARS.

*** *The works, manufactories, &c., respecting which information is given in this Table are all of an extensive character, except in cases where the existence of industries of an uncommon or interesting nature might appear to call for notice. Every bootmaker's, tailor's, dressmaker's, carpenter's, cooper's, blacksmith's, baker's, or confectioner's shop may, in a certain sense, be called a manufactory, but no attempt has been made to enumerate such places.*

NOTE.—The patents applied for numbered 1,097 during the period from 1854 to 1867, both years inclusive; 124 during the year 1868; 139 during the year 1869; 119 during the year 1870; 133 during the year 1871; 122 during 1872; 146 during 1873; 147 during 1874; 154 during 1875; and 155 during 1876. The discrepancy between the actual numbers and those obtainable by adding up the columns may be explained by the fact that many patents refer to more than one subject, and have, consequently, to be classified under two or more headings.

EXTENT AND VALUE OF GOLD WORKINGS.

RETURN showing the Number of Distinct Quartz Reefs actually proved to be Auriferous, the Total Extent in Square Miles of Auriferous Alluvial and Quartz Ground actually worked upon, and the Estimated Value of Gold Mining Claims, and Lands held under Gold Mining Leases, in the several Mining Districts, during the Year 1876.

* The number of "distinct" quartz reefs cannot be strictly correct, as parts of the same reef, in some localities, are held to be distinct reefs, and named accordingly. As the reefs are further explored, it is found, too, that what were supposed to be separate reefs are not really distinct.

† The extent of auriferous ground is here put down from estimates made by the Mining Surveyors and Registrars, not from actual surveys; and in a few instances the estimates of the present Surveyors and Registrars differ from those made by their predecessors. The figures vary from year to year; as the shallow alluviums of the older goldfields are abandoned by the miners, they are taken up and occupied, under the provisions of the Land Act, by agriculturists and gardeners, and ground which one year was included in the estimated area of gold workings is excluded in another.

NOTE.—This Return was received from the Mining Department.

AVERAGE YIELD OF AURIFEROUS QUARTZ.

RETURN showing the Average Yield of Gold from certain parcels of Quartz Crushed in 1876 in the several Mining Districts, from Returns made by the Mining Surveyors and Registrars.

Total	1,011,808	4	534,328	6	19	0	10	13·48

NOTE.—This Return was received from the Mining Department; it does not show the total quantity of quartz crushed in the several localities but only the yield of certain "crushings" respecting which the Mining Surveyors and Registrars have been able to obtain information. Owing to the circumstance that many of the machine-owners are unable to give, or are precluded from giving, information, it is impossible to get complete returns from every district, and, in considering the relative importance of each district as regards quartz mining, the tables relating to machinery should be examined and compared.

Since the first publication of the Statistics, information has been obtained concerning 13,402,915 tons 2 cwt. which have been crushed, and yielded 7,547,530 ozs. 3 dwts. 5 grs. of gold, being an average of 11 dwts. 6·30 grs. per ton.

PRODUCE OF GOLD FROM QUARTZ VEINS AND ALLUVIAL WORKINGS.

Return showing approximately the Gold obtained from Quartz Veins and Alluvial Workings during the Year 1876.

	ozs.	dwts.
From Quartz Veins	587,291	9
From Alluvial Workings	346,932	13
Total Gold Exported and Minted	934,224	2

Note.—This Return was received from the Mining Department; the above figures are but rough approximations. The Mining Surveyors and Registrars can furnish only estimates based on information afforded by the banks and gold-buyers, and on their own knowledge of the character of the workings in their districts. The check on the returns—and not a sufficient one—is that afforded by the returns of quartz and quartz tailings crushed, pyrites operated on, and washdirt and cement treated, which, however, cannot and do not comprise information respecting all the stuff put through the mills.

[10] These figures have been taken from the return for 1875, as the statement of assets and liabilities is only made up once in every three years.——[11] These totals do not show the whole amount advanced by building societies, as several, including one of the largest, the Metropolitan, have not furnished the information.

**** In order to save time, the returns of Imports and Exports are on this occasion published alphabetically as furnished by the Customs Department, instead of in classified arrangement as in the case of the Imports and Exports for 1875. In the "Victorian Year-Book, 1876–7," now being printed, the Import and Export entries will be found duly classified according to the system agreed upon at the Statistical Conference held in Tasmania in January 1875. (See Report of Conference, Parliamentary Paper No. 11, Session 1875.)*

[1] Including cotton and woollen mixed piece goods.——[2] The returns of the year 1872 are the first which include the quantity of wool imported into Victoria across the Murray.——[3] Prior to the end of 1867 the bulk of the gold received from other colonies was transhipped under bond, in order to avoid payment of the export duty; it therefore did not appear in the returns of Imports and Exports. Since that date the export of gold has been free, and consequently the receipts and shipments of gold have been embodied in the general returns in the same manner as those of any other commodity.——[4] Useful four-footed animals, such as horses, cattle, sheep, pigs, goats, asses, &c., are included in this line. Poultry and other birds, wild beasts, &c., are omitted.

HENRY HEYLYN HAYTER, Government Statist.

[1] Including cotton and woollen mixed piece goods.——[2] Since 1875 the goods which were formerly placed under the general head of drapery have been spread out under headings indicating the distinctive character of the articles.——[3] The returns of the year 1872 are the first which include the quantity of wool imported into Victoria across the Murray.——[4] Prior to the end of 1867 the bulk of the gold received from other colonies was transhipped under bond, in order to avoid payment of the export duty; it therefore did not appear in the returns of Imports and Exports. Since that date the export of gold has been free, and consequently the receipts and shipments of gold have been embodied in the general returns in the same manner as those of any other commodity.——[5] Useful four-footed animals, such as horses, cattle, sheep, pigs, goats, asses, &c., are included in this line. Wild beasts, &c., are omitted.——[6] Including galvanized ironware.——[7] Since 1875 Military and Government Stores have been returned under heads indicating the distinctive character of the articles.

† The lengths of the Williamstown and North-Eastern lines are given from the Footscray Junction and the Essendon Junction. These are points on the Murray line distant from the Victorian railway terminus 3¼ miles and 1½ miles respectively. The Ballarat line starts from a point on the Williamstown line called the Williamstown Junction, distant 6¾ miles from the same terminus.

‡ This amount is exclusive of the cost of rolling stock, preliminary surveys, &c., which was usually in former years included under this head.

§ This represents the cost to the present company; the original cost was much greater.

[1] This column presents a statement of the average numbers attending at one service only on the Sabbath, and it has been pointed out that this mode of calculating the attendance does not render the returns of the different denominations strictly comparable, inasmuch as, in connection with some religious bodies, there are several services held on the same day, at each of which an entirely distinct set of worshippers attends, whilst, in the case of other denominations, the attendance at subsequent services always consists, to a greater or less extent, of the same individuals as were comprised in the first congregation.——[2] The Registrar of the Ballarat Diocese reports that 7 parishes did not furnish statements of church accommodation and 19 parishes did not furnish statements of church attendance. These numbers must therefore be incomplete.——[3] The Secretary of the Congregational Union has been unable to furnish returns for 1876, the figures for 1875 have therefore been repeated. The total number of buildings used for public worship by this denomination for that year was supplied, but no particulars were given as to how many of them were regular churches or chapels, and how many were schoolhouses or other buildings. For this reason the sum of the figures in the first three colums of the total line is less than the total in the fourth column.——[4] The figures relating to the Roman Catholic Church are only approximate.

* The figures in these columns represent the total number of children on the rolls of public schools during 1876 uncorrected for attendance at more than one school. It is estimated that 194,018 distinct children attended these schools during the year. The mode of computing the distinct children has been different from that adopted in former years. If the latter had been continued the estimate for 1876 would have been 201,817.

[1] In connection with the Melbourne Grammar School there are three scholarships of the annual value of £21, for boys under 14, tenable at the school for three years; and two exhibitions of the same annual value, tenable for two years, open to the competition of boys proceeding to the Melbourne University, whose names have been for the two previous years on the books of the school, and who have passed the Matriculation Examination with credit. There are at present two State School exhibitioners in the school.——[2] There were seven exhibitioners from State Schools under education in the Geelong Grammar School during 1876, one of whom passed the Matriculation Examination with credit in the October Term.——[3] In connection with the Wesley College there is a scholarship called the "Draper Scholarship," which has been established in memory of the late Rev. D. J. Draper, who perished in the *London*. It is of the value of £25, tenable for one year. Two other scholarships have also been lately founded by Mrs. Powell, to be called the "Walter Powell Scholarships," in memory of her late husband. They are of the value of £40 each, payable in two annual instalments of £20. Accepted candidates for the Wesleyan ministry form a distinct division, but their admission is only a provisional arrangement awaiting the proposed establishment of a Theological Institution.

[1] The large increase in the number of scholars in Public Schools shown in the returns for 1869 and subsequent years is partly owing to the fact that, in the figures supplied by the Education Office for each year prior to 1869, the average monthly number of children on the Rolls was given; whereas for and since that year the total numbers who attended the schools were returned. For the year prior to that in which the change was made, and for each year since, the information has been supplemented by an estimate of the number of distinct children who attended the schools.——[2] The mode of computing the distinct children in 1876 differed from that adopted in former years. If the latter had been continued the estimate for that year would have been 201,817.

[1] The Secretary of the Congregational Union has been unable to furnish the returns for 1876, the figures for 1875 have therefore been repeated.

[2] The figures relating to the Roman Catholic Church are only approximate.

Note.—Several of the denominations have not distinguished the sexes of teachers and scholars, hence the sum of males and females in the total line does not agree with the total of both sexes.

[1] The Spiritualists, although perhaps not strictly speaking Christians, are included under this heading. They do not occur in the returns prior to 1873.

[2] In the returns for 1875 the Wesleyan Methodist denomination, for the first time, furnished the "Average number of scholars attending." For previous years it returned the number on the rolls, which was different from the practice of other religious bodies.

[1] It is probable that the figures in these columns do not always indicate distinct individuals, but acts of relief, and that a person relieved over and over again is the cause of as many entries as he is times relieved.——[2] Children are not included in these totals.——[3] This includes a grant of £25 from the Eaglehawk Borough Council.——[4] This includes a grant of £200 from the Emerald Hill Town Council.——[5] This includes a grant of £35 from the Richmond Town Council.

Note.—The returns of some of the societies do not distinguish the sexes of the persons relieved, hence the sum of the males and females on the total line does not agree with the total of both sexes. The returns of receipts and expenditure represent the absolute amounts received and expended during the year, exclusive of credit and debit balances, &c.

HENRY HEYLYN HAYTER, Government Statist.

BENEVOLENT SOCIETIES, ETC.—RETURN FOR SIX YEARS.
